New World Order
DAO ESTD 2021.

The **New World Order DAO** serves as the blueprint for a new decentralised world **STATE**.
A network operating within the larger system of free sovereign individual capital autonomy. It disseminates ideas and knowledge through a democratically governed body working for civic and economic equality.

founder´s statement

Publicae [Latin, literally: the public thing].
Politic/s: Latinization of the Greek πολιτικός (politikos) from πολίτης (polites, ‚citizen‘) and πόλις (polis, ‚city‘).

words & action.

PUBLICAE is a Norwegian registered Non-governmental organization (NGO), we are wholly dedicated and committed to political neutrality while working towards establishing an unbiased & fair political advertising platform. Benefitting from the innovation in Blockchain Technologies, PUBLICAE will meet an increased need for attention allocation techniques. Our platform enables more effective competition among political rival entities, both individual and organizational.

Through the official STATE mobile app, organizations can enjoy higher levels of effective outreach in selected demographics and lower costs for their promotional campaigns. Our platform is maintained by the **Politicoin (PBLC) utility token & New World Order (STATE) governance token**. Our value proposition offers less dependence on external publishers and advertisers.

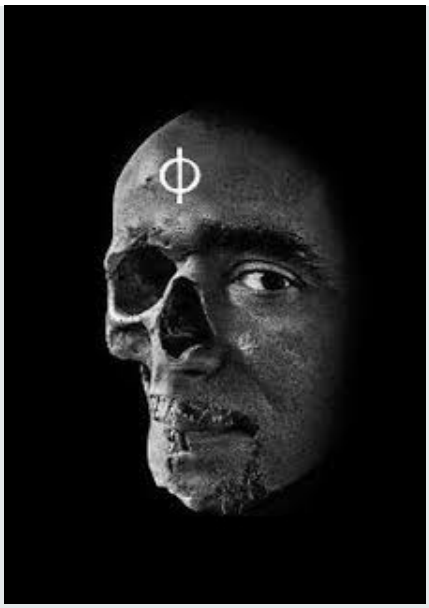
PUBLICAE´s platform users are less likely to settle for alternative mass-market solutions, thus the distributed wealth creation and added value on the PUBLICAE platform creates incentives that will secure attention retention.

The cost of ad exposure and its effects on citizen attitude and political behaviour is massive and complicated, this in part due to the ad market nature which is run by faceless middlemen. These public relations agents are not responsible to voters or publishers.

PUBLICAE´s blockchain-based rewards-system is public politics, it places the discourse between consumers and advertisers into an honest transactional dialectic exchange, a system void of any intermediaries and external censorship.

PUBLICAE is a political philosophy consensus for the New World Order.

STATE will usher humanity into a global community of respect for knowledge and shared equanimity.



Ciprian Pater
@PaterPontifex

Political parties, Non-government organizations, accredited educational instituttions and faith-based communities will be able to purchase the official PBLC token on the platform in order to advertise their causes, efforts and messages to users that will receive STATE tokens for their attention.

The simple truth is; that people are driven by incentives, in one way or another.

People define their relationship with an institution (including their government) or a specific person, be them officials or not, by the transactional incentives and values which they gain from any such given relationship.

Politicians in general and political advocates, may earnestly differ on the topic of whether economic incentives can impact citizen behaviour.

Yet truly, the financial and monetary regulations that govern everyday life in society, are common tools through which both microeconomic and macroeconomic policies clearly show; that electoral outcomes are heavily dependent on societal economic incentives.

Some observers maintain, that candidates and parties, regardless of right or left spectrum, tend to converge to the same economic policies - those of the median voter - so that whoever wins an election is inconsequential to the economy, thus the electorate get mostly empty promises in return for their vote.

"All things are subject to interpretation. Whichever interpretation prevails at a given time is a function of power and not truth." Friedrich Nietzsche

power of audience.

our mission

Introduction

PUBLICAE enables verified advertisers to purchase the attention of people, users can earn STATE by watching video ads from publishers and convert their tokens to fiat currency or choose to donate some value back to their preferred organization.

Users can also purchase STATE tokens on selected exchanges without engaging with ad content. The PUBLICAE platform offers a secure KYC process for user registrations before any donations can be made, all transactions are transparent and serve as the basis for ethical outreach tools in the decentralized NWO DAO community.

old vs new technologies.

Problems arise, when the costs of advertising are so high on old common outreach avenues, that only organizations of financial substance can afford to participate with adequate and timely outreach efforts.

No values, no moral.

Major advertising firms and global professional associations are widely deplored against the need of accountability for political advertisers and their unwillingness to adhere to a code of ethics.

Your vote

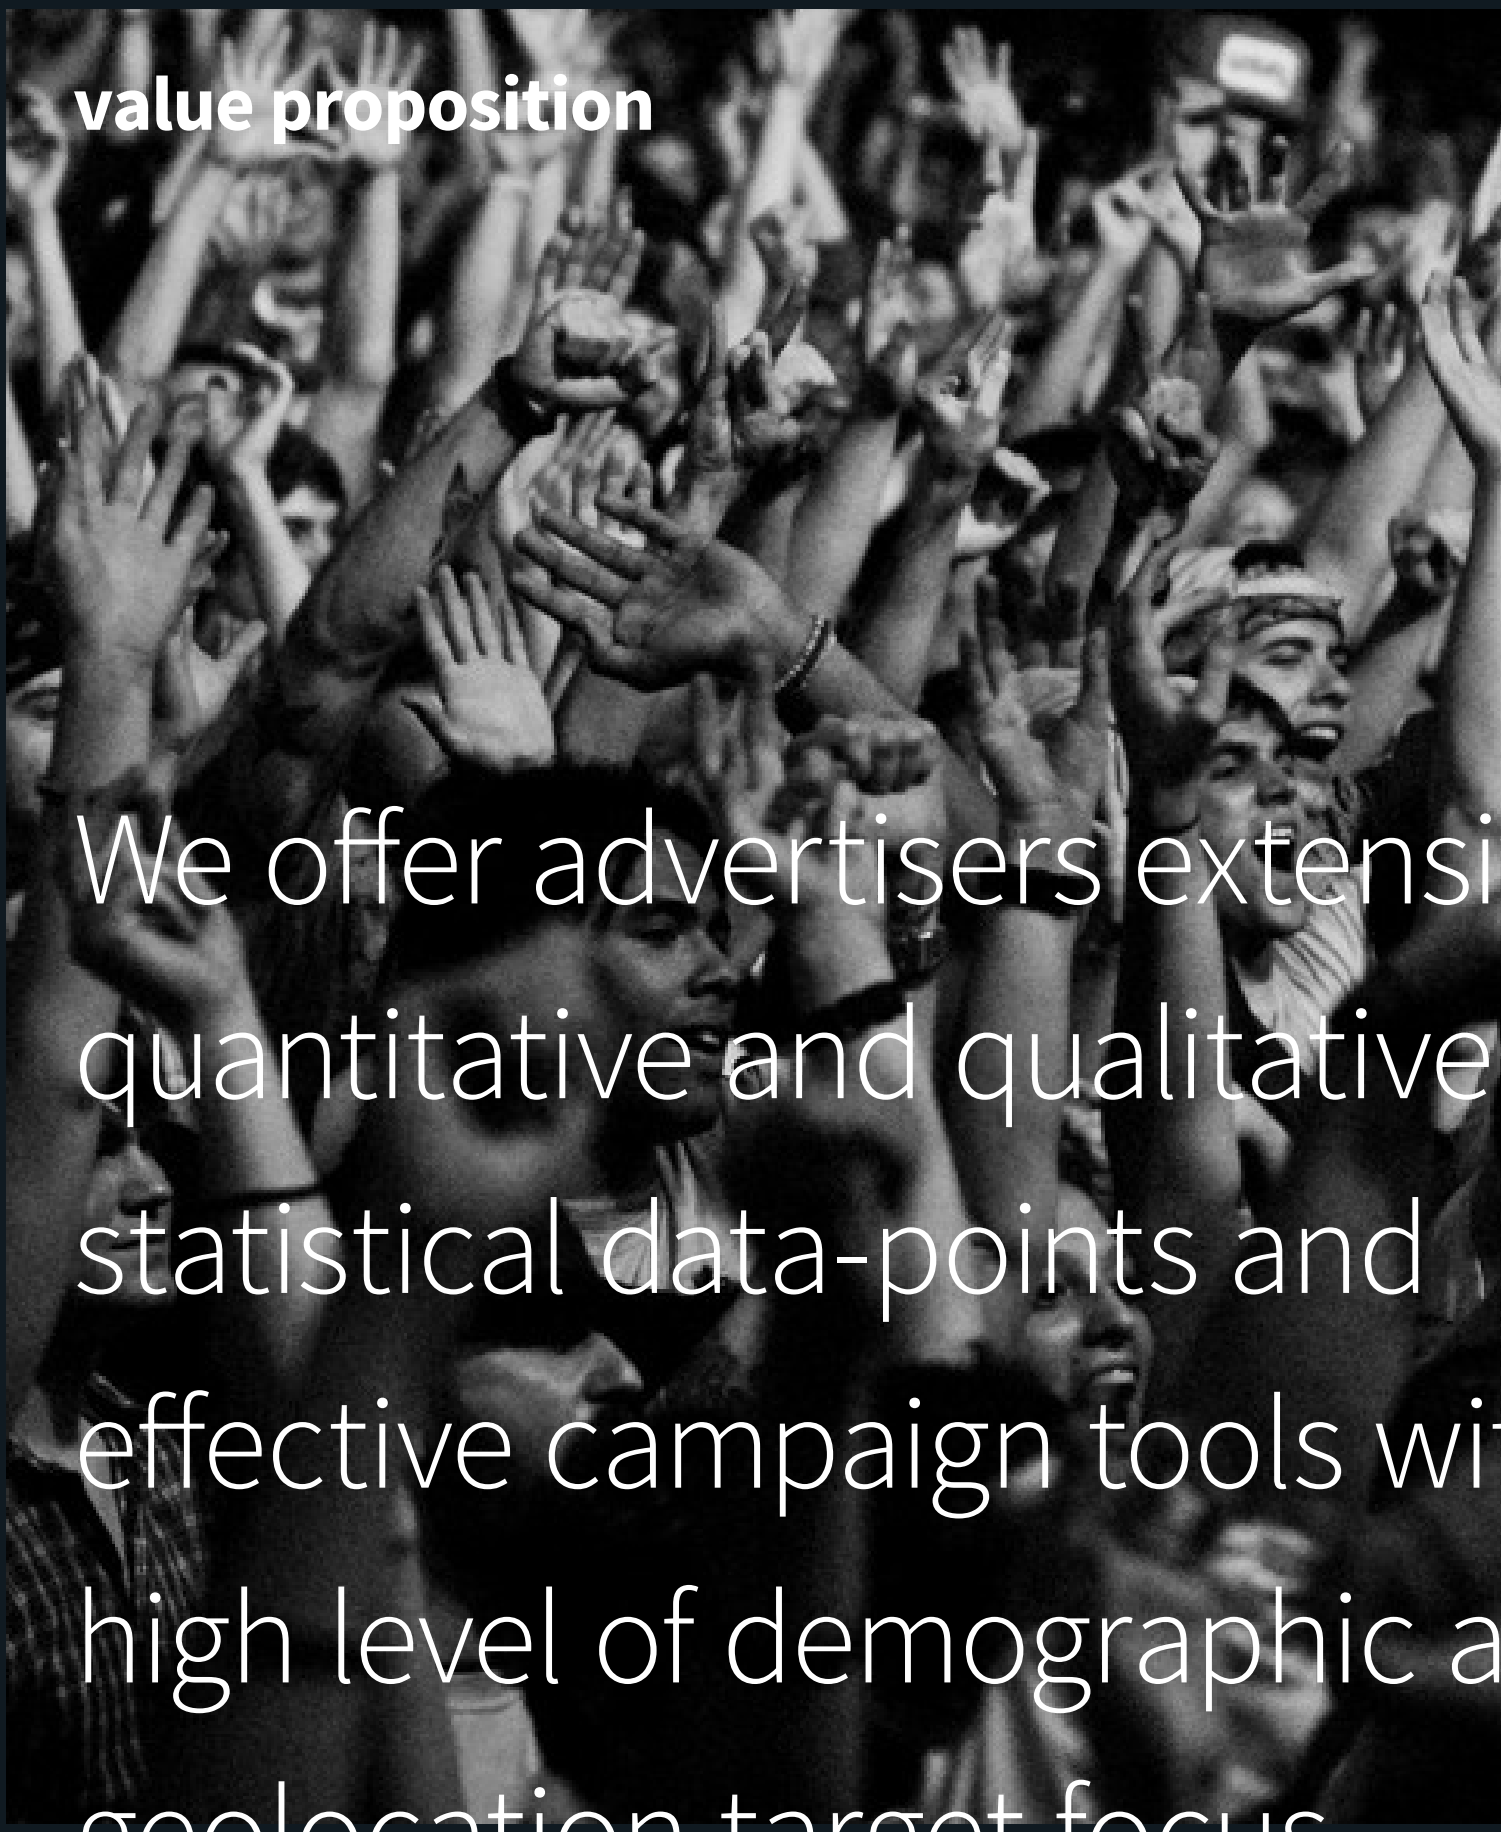
Declining voter turnout, as a negative trend in democratic participation has during past decades raised many concerns among election stakeholders.

Meta-analysis reveals; that political ad spots increases issue knowledge, influences perceptions of the candidates' character, alters attitudes, affects candidate preference, influences agenda-setting and alters viewers vote likelihood (turnout). NWO DAO invites people worldwide, to engage in issue and knowledge transfer based on personal financial gain through incentivized and monetized attention.

Your value

PUBLICAE is earnestly carrying out our due diligence to gather the support we need to empower and emancipate people globally in full compliance with Political Party Funding regulations.

An advertiser must allocate PBLC tokens into incentive campaigns, the funds get algorithmically shared as STATE token rewards among all viewers. Disbursement is based upon pre-defined allocation targets and equity is split in fair percentages among all viewers ensuring a highly measurable demographic specific influence from each ad placement campaign.



value proposition

We offer advertisers extensi
quantitative and qualitative
statistical data-points and
effective campaign tools wi
high level of demographic a
geolocation target focus.

our advertisers

01
Political
Activities associated with the governance of a country or area.

02
Educational
The process of receiving or giving systematic instruction.

03
Charitable
Organisations that provide help and raise money for those in need.

04
Religious
The belief in and worship of a superhuman controlling power.

NWO DAO Supervision & Implemenation

The idea of PUBLICAE came out after the realization; that the electorate in all indirect representative democracies, gains no real value in return after entrusting their power to elected officials by their casted vote. The act of being able to freely choose, is not a guarantee, that their will or wish will be adequately carried out by the elected officials once in a position of power.

Without the effort by the voting public, to scrutinize the political platforms of parties and candidates, they become easy prey to biased social conditioning. The current practice is also perpetuated by many social media platforms, these have intentionally or haphazardly devolved into paid gatekeepers of public perception which they artificially influence for profit.

what we offer

Traditional media is now struggling to retain the attention of its audience and viewers. Attention has become so valuable that it has evolved into a new form of asset class, one that can be traded as it has intrinsic store of value. We aim to usher in a new era of political action method with correct appraisal of knowledge.

Target

We enable organizations to improve their advertising strategy and align their currency inflow efforts with rewarded audience targeting.

Tokens

STATE token donations recieved by charities and NGOs offers a big advantage for organizations that promote their causes worldwide.

Oversight

Cryptocurrencies are trackable and each transaction is recorded on a public ledger, a transparent and accountable process for donors.

Capital

Cryptocurrencies are like any other asset, no taxes are owed on the capital gains of donations to charity, NGO thus receives more money.

leadership

Change the way you think about ideas.

Now more than ever, getting the proper attention of people has never been this difficult. This forces organizations and institutions to purchase more ad slots and longer airtime. This scenario, makes it very difficult for smaller entities that have more limited financial resources to compete with on a level playing field.

Leveraging blockchain technology, we will provide a highly robust and secure transparent infrastructure based on a reward-system which requires advertisers to actively cultivate a meaningful and socially relevant open discourse within the community.

Scale your outreach for less.
According to the Chronicle of Philanthropy's June 2018 report, the percentage of Americans donating money to charity has fallen from 66 percent in 2000 to nearly 50 percent in 2018.

Change minds to reach your goals.
Attention is the allocation of mental resources, especially as a consideration with a view to action.

Increase awareness, not the volume.
Before consumers can be affected by messages, they need to be paying attention first and foremost.

@Publicae Telegram Admins / Doxxed NWO STATE DAO Managers

Commissioned TG @Publicae Admins are officers of the highest ranks in the ”NWO Army”. These officers hold commissions and are confirmed at their ranks by the Publicae NGO Board of Directors.

NWO STATE DAO aims to act as a decentralized autonomous organisation, an emerging legal structure with no central governing body. To accomodate an effortless adminstration of our community members rights to share a common goal. Publicae NGO thus acts in a transitional period in the best interest of the DAO entity. NWO STATE DAO, as a decentralized autonomous organization and entity structure, allows $STATE ERC20 Governance tokenholders to participate in the management and decision-making of the entity.

There will be no central authority in NWO STATE DAO, no Publicae Admins and no CEO; instead, power will be distributed across token holders who collectively democratically vote on governing. NWO STATE DAO treasury is allocated $STATE tokens issued to a specific wallet which community members of the DAO can vote on the expenditure of those funds; STATE-III.eth - 0x86adACe73556FD7b386B5E469eEC0878073d6D30

An emerging theme of Publicae NGO and NWO STATE DAO is the focus on social impact worldwide. Publicae recognises the vital need for a natural harmony to exist between our NGO and DAO as due dilligence is made to ensure our social impact efforts.

NWO STATE DAO main goal is to achieve a New World Order for the future of humanity, one which stands to reach far beyond the failures of the old power structures and economic systems and other speculative blockchain efforts like Bitcoin whom all have long ago forsaken the ideals and values of genuine and true decentralization of knowledge and power!

world political regimes

+100

A democracy is a political system with institutions that allows citizens to express their political preferences.

+80

In an autocracy, political preferences cannot be expressed and citizens are not guaranteed civil liberties.

-20 %

Voter turnout has been declining across the globe since the beginning of 1990s by an average of 20%, a trend which clearly weakens democracies.

Political Freedom?

Effective Data.

Traditional media is now struggling to retain the attention of its audience and viewers. Attention is thus a necessary ingredient for any effective advertising regardless of target audience location.

Our Political Philosophy.

PUBLICAE is an expression of advances in modern technological libertarianism, herein users can gain back the trust in official political agendas. It aims to enable political interaction with full transparency and accountability, across borders and regimes worldwide.

Disinformation and other forms of manipulative, antidemocratic communication have emerged as a problem for Internet policy. While such operations are not limited to electoral politics, efforts to influence and disrupt elections have created significant concerns. Data-driven digital advertising has played a key role in facilitating political manipulation campaigns. Rather than stand alone incidents, manipulation operations reflect systemic issues within digital advertising markets and infrastructures.

consonance?

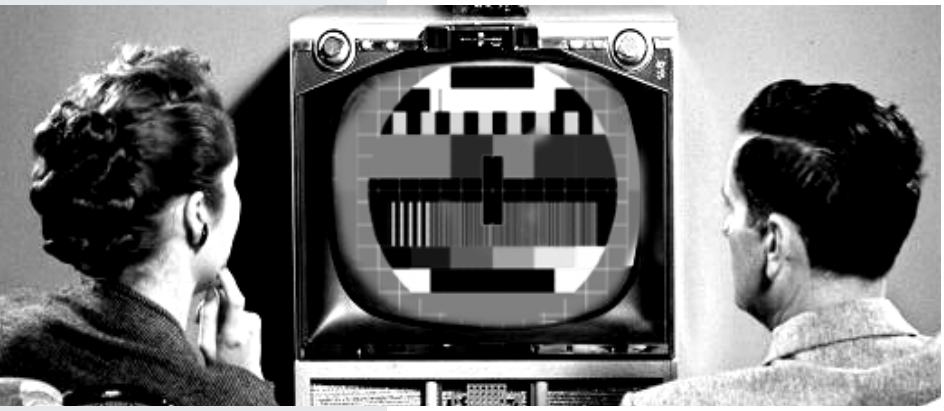
Irrespective of the means to attain it, attention always comes at a price...

Showcase your knowledge.

The issue of paid advertising, for political parties or NGOs, is generally uncontroversial. The practice worldwide is almost universal: advertising is permitted, subject only in the case of politics to some limitations such as campaign spending ceilings and possible temporal restrictions on content, for other actors mostly anything goes...

message research

Leading data analysis market.



+89 %

The highest turnout rates among OECD nations were in Turkey.

+77,2 %

Turnout in Norway's 2021 parliamentary elections.

Always broadcasting ...

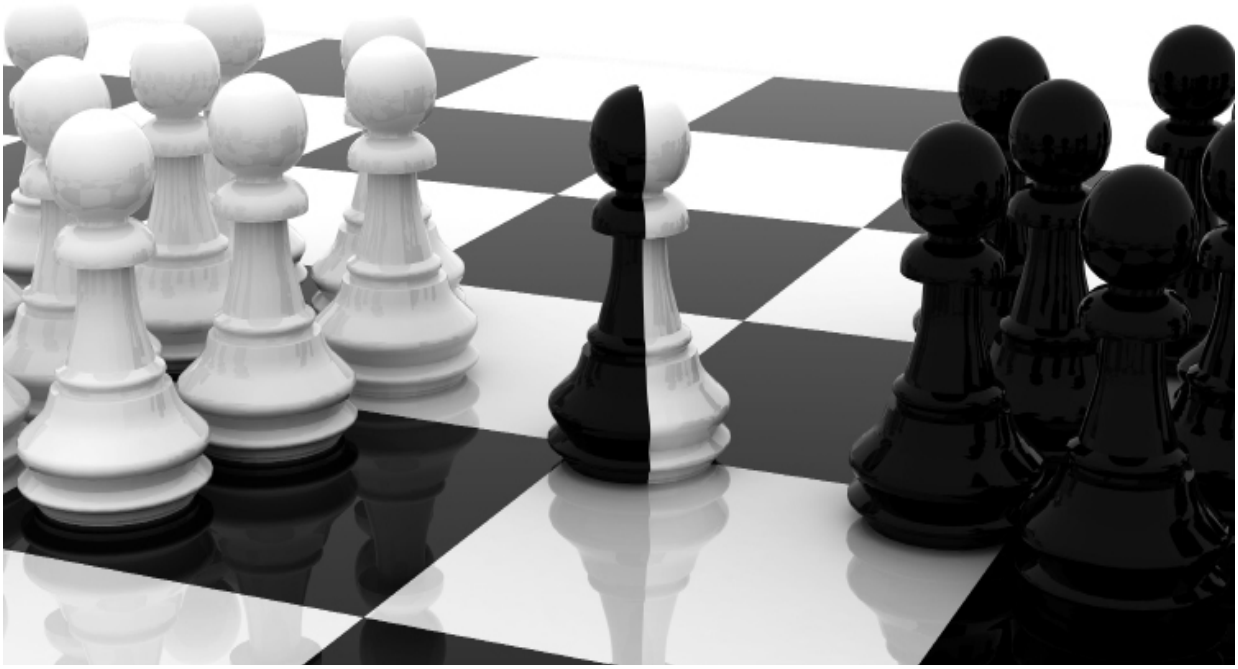
Radio, television, newspapers and other mainstream media outlets, have remained the preferred medium for political ads. Nonetheless, the effectiveness of capturing the attention of its target market is contentious as newer forms and more versatile types of media chanels have emerged.

Researchers have lacked good measures of individual-level variation in exposure to political messages. In other words, even if one has good measures of the political messages that are being disseminated, one cannot assume that everyone has been exposed to the same number or quality of messages.

In politics, analysts use these techniques to guess two things about you: which candidate you favor, and whether you are likely to vote. In this respect, incentivized messaging yields a much better get-out-the-vote effort.

Broadcasters are either publicly owned or receive their share of the frequency airtime from a public body. A common pattern of course, is for the public broadcaster to give free direct access slots according to predetermined egalitarian criteria, while private broadcasters sell advertising slots to parties and candidates often according to different profit maximizing criteria.

data analytics



Stats.

+72 %

Hungary's 2018 parliamentary elections

+66,5 %

U.S. 2020 presidential election casted ballots.

Always controversial

The current state of political advertising is raising concerns.

Facebook is the dominant digital platform for US political ads, capturing a 59.4% share during the 2019/2020 election cycle. That equates to $796.8 million.

Google is No. 2 among US political advertisers, capturing 18.2% of all digital political spending during 2019/2020. That equates to $243.7 million.

PUBLICAE intends to become among the top 3 US political advertisers and the largest by total global market share by 2024.

Benchmarks for expected efficacy can show if advertisement plans and broadcasted messages positively communicate the intended information; such active influence affects the evaluations or opinions of voters, and finally it affects the voter turnout.

by the numbers

expe.

>>>
2017

+100 %

A survey of the world's 50 biggest humanitarian non-governmental organizations (NGOs) by expenditure found their total annual spending has more than doubled to $18 billion.

expe.

>>>
2016

$ 1.2 Trillion

Religion annually contributes about $1.2 trillion dollars of socio-economic value to the United States economy, That is equivalent to being the world's 15th-largest national economy, outpacing 180 other countries.

expe.

>>>
2019

$ 2.2 Billion

U.S. colleges collectively spent $2 billion on advertising marketing themselves to attract students in 2018 and $2.2 billion in 2019, according to the brand consulting company Kantar.

+90 % positive ROI.

Change the way you think about ideas.

The challenges of advertising raises questions regarding mainstream media impact and efficacy of campaign expenditures. With PUBLICAE´s Ad-Tech video tools campaign managers can pinpoint eligible voters or audience who are likely to support them.

Nearly 90% of video marketers find video provides a positive ROI. Cross Screen Media and Advertising Analytics estimates the video ad market for politics will grow by 50% from 2018 to 2020, reaching a staggering projected $6 billion in the US alone. The new study estimates that political advertising will account for 4-5% of the total video ad dollars and account for 17% of total market growth.

+ 2 Billion Voters

Nearly two billion voters in 50 countries will head to the polls this year.

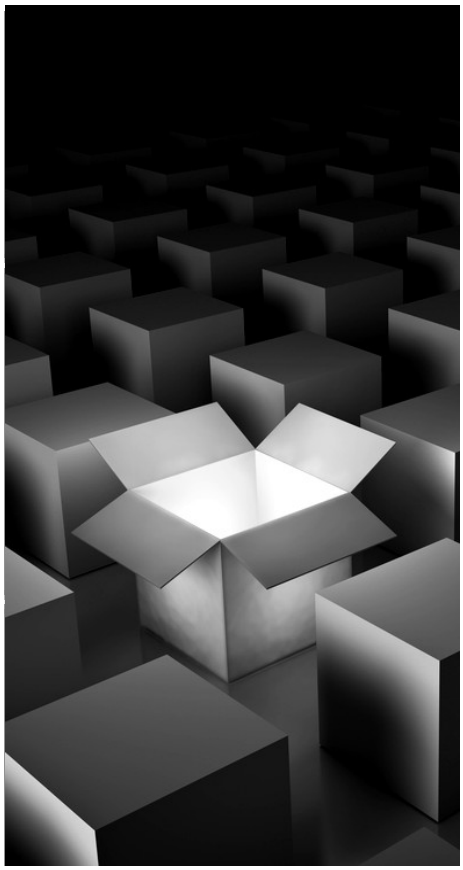
+4.2 Billion

In 2020, over 4,2 billion people were using social media worldwide.

$215.7 Billion

Global Spending on Big Data and Analytics Solutions Will Reach $215.7 Billion in 2021.

work, don´t struggle



A decentralized platform & better market solutions.

By incorporating PUBLICAE´s blockchain technology to their advertising structures organisations can minimize the burden of administrative advertising costs, reach a wider community audience of potential donors and supporters as well as enable a higher level of accountability in their messaging efforts.

change the message

Engineering social interactions.

We believe; that a economic user incentive can better capture user attention on the basis that political power starts with the voter. Social changes, with significant alteration over time results from initial actions, this is alteration of normative agent behaviour patterns.

> Values are the core essence of the person’s identity.

1300 Hours
Americans spent more than an average 1,300 hours on social media.

+7.10 Billion
The number of people that own a smart and feature phone is 7.10 Billion.

+3.9 Billion
An estimate of 3.09 billion mobile owners use messaging apps .

STATE iOS & Android App

Swapping tokens from one chain to another can be difficult and time consuming. Trading cross-chain can also be very costly and can discourage many users from trading cryptocurrency. Without interoperability, the adoption of blockchain will be highly segregated and restricted. PUBLICAE is set to launch the STATE token Interoperable Multi-chain Bridge System (IMBS) designed to allow our users to swap STATE tokens in a user friendly manner from one chain to another supported chain.

opposing (false) truths

PUBLICAE offers variety in political knowledge for our users, this can both serve to increase one's ability to understand a political message, but it also can increase one's ability to resist that message.

When people receive campaign communications, their candidate preferences sometime changes. Rather, more often, the receipt of such messages either activated individuals, turning undecided voters into supporters of candidates, in line with their existing political beliefs, or it reinforced voters' initial candidate preferences.

12 **Employees**

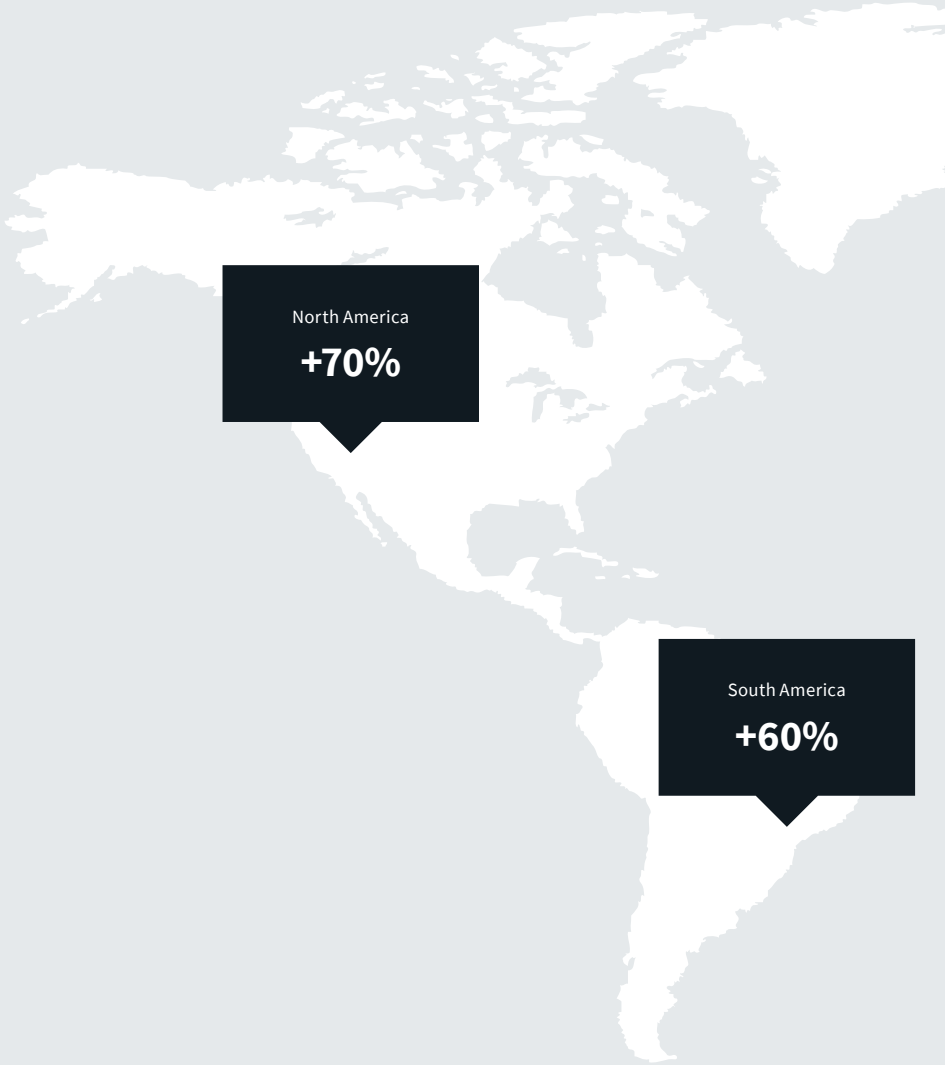
Our current team consist of highly professional and well educated individuals.

100+ **Years**

We have combined high level of technological and administrative experience.

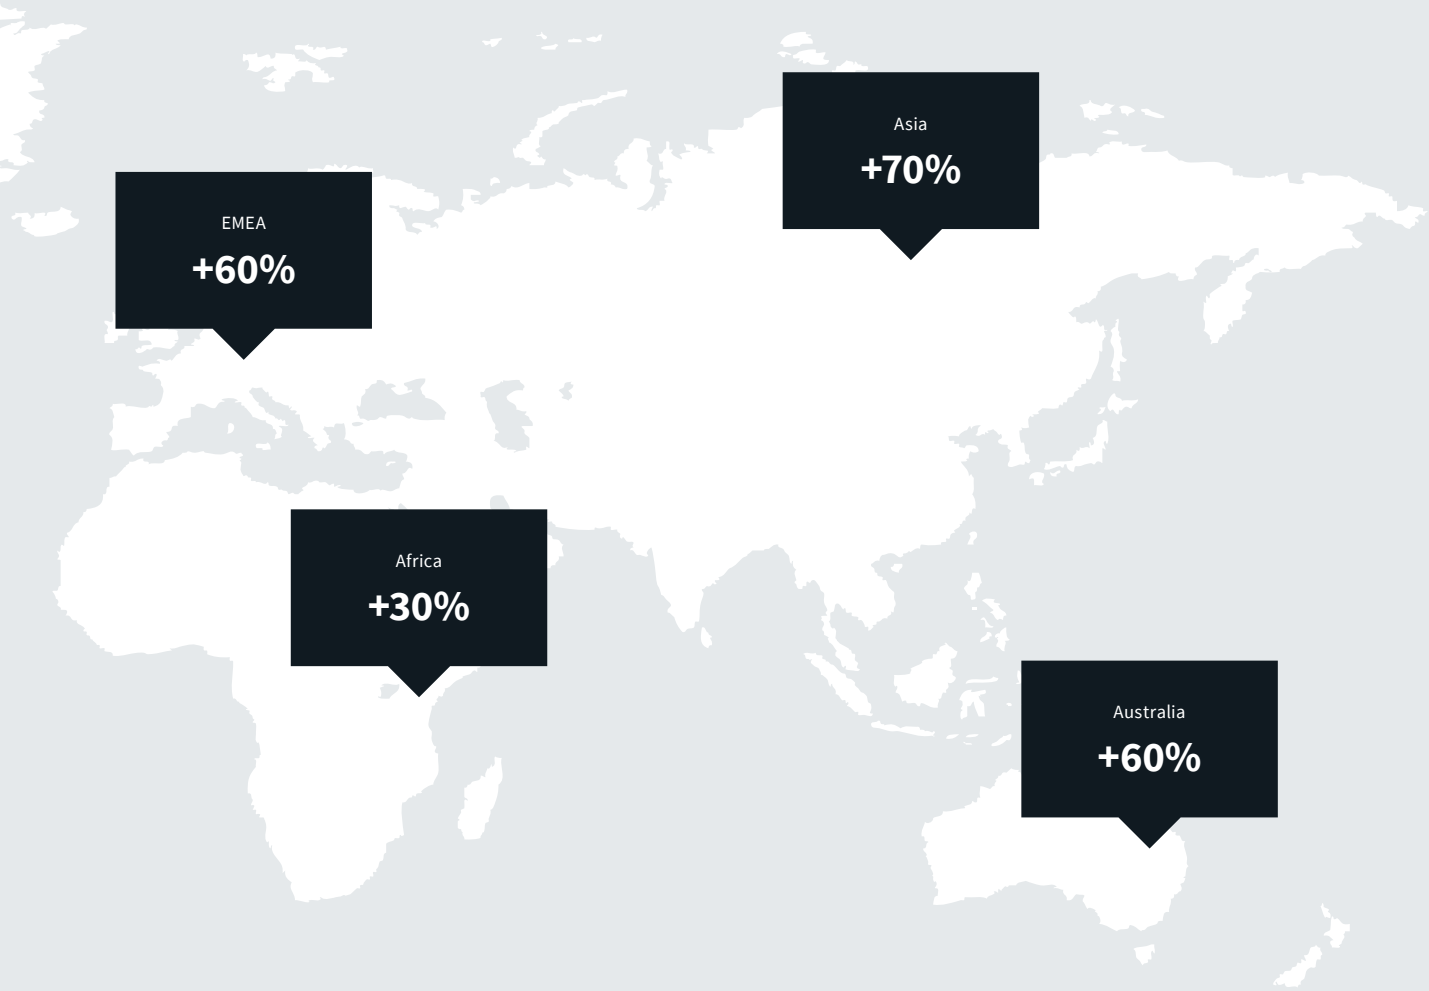
+10K **Community**

Our community across social media platforms is steadily growing slowly but surely.



worldwide.

Worldwide social media user numbers have grown to almost 3.5 billion at the start of 2019, with 288 million new users in the past 12 months pushing the global penetration figure to 45 percent. Social media use is still far from evenly distributed across the globe though, and penetration rates in parts of Africa are still in the single digits.



PBLCNFT tokenomics

PBLC

Politicoin ERC20 tokenomics will integrate the functional utlity of the PUBLICAE NGO and NWO DAO.

STATE

New World Order ERC20 tokenomics will govern the value creation of the international NWO DAO community.

+NFT´s

The total supply of PBLCNFT´s will be capped at $1.37 billion PBLC with 10% initial minting.
Following the launch of our synthetic asset engine, the remaining 90% will be minted.

Decentralization.

Non-fungible tokens.

These NFT assets will allow us to bridge real-world tangible assets like commodities to Politicoin´s structural utility governance. Synthetic Asset PBLCNFT´s are assets that produce the same effect as ownership of the underlying asset like gold or silver.

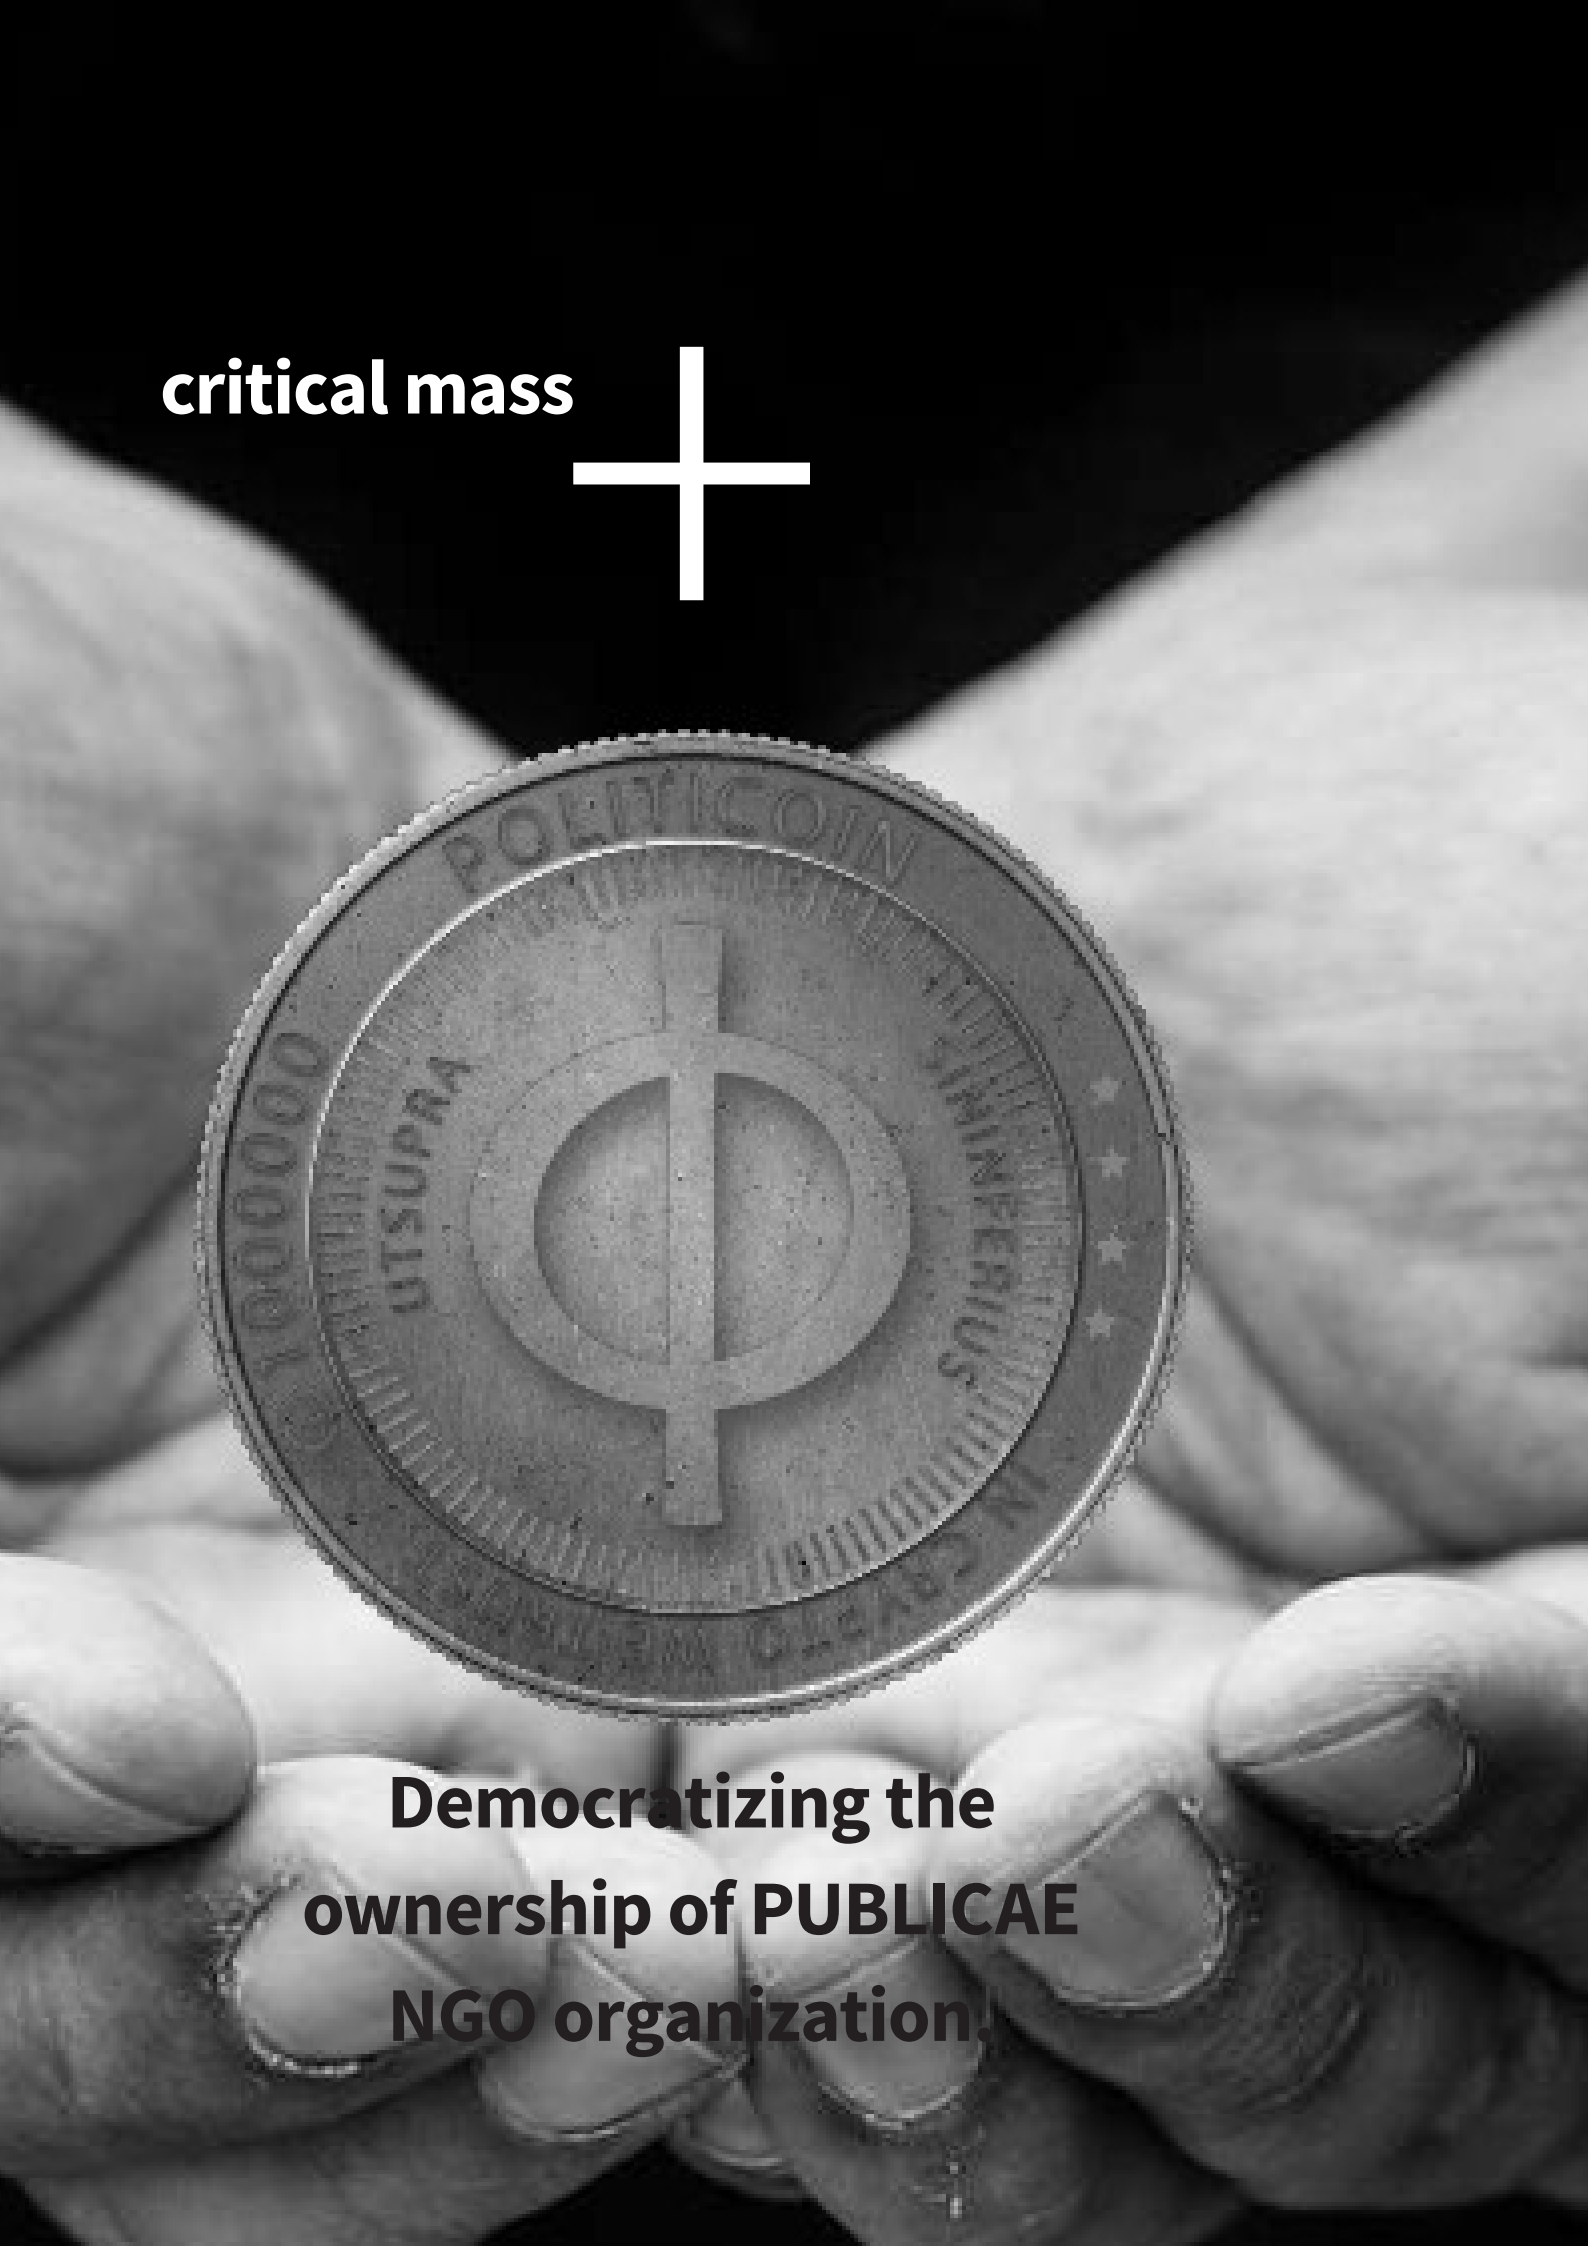
https://opensea.io/collection/politicoin-nft

Politicoin PBLCNFT´s Geolocation GameFi

NWO STATE native features iOS ARKit and Android ARCore functionality. Users will get displayed a mixed-reality global treasure geolocation map pinpointing locations of different values of PBLCNFTs ranging from $1-$1000000 in random places in cities worldwide ready for minting and acquiring of ownership. Collecting Politicoin NFT´s with your device camera in the physical world in real time, is an added value proposition of STATE tokenomics superimposed as three-dimensional virtual objects in the Metaverse.

https://nwo.capital/nft

critical mass



Democratizing the ownership of PUBLICAE NGO organization!

global decentralization

Decentralization allows the Blockchain to be non-reliant on a central authority.

Decentralization has, not only an administrative value, but also an equitable civic dimension, it increases the opportunities for global citizens to take interest in public affairs as they increasingly become accustomed to using their new freedoms of sovereignity which are entitled to them by blockchain technologies.

Decentralization in its most true form, is the transfer of authority and responsibility for public functions from the central government to subordinate or quasi-independent government organizations and/or the private sector. Accordingly, the NWO DAO will serve as a new democratic foundation for global public governance through transformation of political reality.

NWO DAO is a decentralized autonomous organization (DAO) operational through the STATE governance smart contract. The contract defines the democratic rules of the organisation and holds the community treasury.
